Introducing Infinity Origin. An evolution of the original market leader

We are delighted to announce that we are reintroducing what many readers will know as the Infinity Standard back to the market. Re-named Infinity Origin, this evolution is a tribute to the heritage that launched our journey into intelligent maritime solutions.

With this reintroduction, we celebrate the engineering simplicity, versatility, and reliability that defined our early innovations. It will be available in two versions, Infinity Origin and Infinity Origin Rack. Based on the fanless Advantech Uno 247 v2 platform, the Infinity Origin option represents our commitment to compact, resilient design.

Try Inmarsat NexusWave with Navarino

Navarino is now an authorised partner of NexusWave, the latest fully managed, bonded connectivity solution from Inmarsat.

NexusWave is powered by specialised network-bonding technology that seamlessly integrates multiple networks - GEO (Global Xpress Ka-band), LEO, coastal LTE and L-band into a single, high-performance connection.

The service offers real-world speeds reaching up to 340Mbps download and 70-80Mbps upload, backed by over 99.9% network availability.

Exploring Cobham's new facility in Thailand

This summer, we were delighted to be invited to visit Cobham Satcom's cutting-edge production facilities in Thailand. Joined by several customers from the Asia region, our Managing Director for Asia Pac, Spyros Georgiou and Account Manager Rena Tan were able to tour this expansive, highly impressive factory to learn about how Cobham Satcom is building its renowned new generation of satellite antennas.
