### Navarino's technology supports "K" Line in Northern Lights EU Decarbonisation Project

"K" Line Energy Shipping (UK) Ltd, based in London, manages a fleet of 10 vessels operating worldwide. Their vessels will be taking part in the Northern Lights project, which transports and delivers CO2 to special storage facilities in Norway in order to help the mitigation of industrial emissions that cannot be avoided, and to accelerate the decarbonisation of European industry.

In order to help prepare their ships for this project, "K" Line have recently chosen to enhance the connectivity capabilities of their fleet with Navarino. The company will be deploying 2 Starlinks per vessel, for crew welfare usage and for business use. The two terminals will be managed and controlled using Navarino's Infinity solution

#### Navarino Annual Event 2025

Every year, Navarino gathers its staff from around the world for our annual company event, and this February saw us do just that, at the spectacular Eugenidis centre in Athens.

This annual tradition is an opportunity for us all to hear from our leadership, who look back on the highlights and challenges of the year just gone, while also looking ahead and outlining our corporate strategy for the 12 months ahead.

This year was particularly special as it marked Navarino's 25th years of operations.
