Ronald Spithout Appointed Chairman of Navarino

We are delighted to announce that Ronald Spithout has been appointed as Chairman of the Board for Navarino.

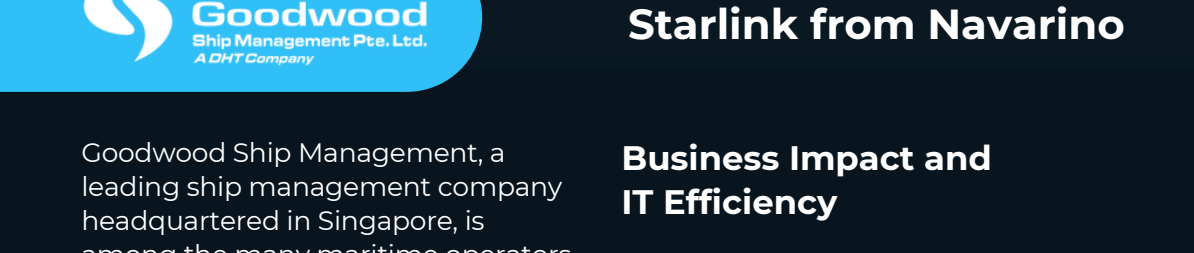

Having served as President of Inmarsat Maritime and before that as President of Inmarsat Enterprise, positions he held for a combined 10 years, his commercial acumen was put to good use as he oversaw the rollout of Inmarsat's Fleet Xpress service to the maritime sector. In addition, he has held positions on the Boards of several maritime technology companies, as well as senior roles at Xantic and Stratos Global, among others.

His deep industry knowledge and proven track record in driving business expansion are a perfect fit as Navarino enters its next chapter of development.

Dimitris Tsikopoulos remains CEO of the company and looks forward to working closely with Ronald, commenting "As a long-time partner and friend, I am very pleased to welcome Ronald to the Navarino family. His expertise and guidance will play a key role in strengthening our presence in the maritime sector, and his strategic nous will be invaluable to our next phase of growth."

Goodwood Ship Management Embraces Digital Transformation with Starlink from Navarino

Goodwood Ship Management, a leading ship management company headquartered in Singapore, is among the many maritime operators embracing the future of connectivity at sea through Starlink from Navarino. In a recent conversation with Mr. Balasubramanian Balamurugan, Senior IT Manager at Goodwood, he shared insights into the company's digital journey and how Starlink, supported by Navarino IT solutions, has transformed operations across their fleet.

Mr. Balasubramanian Balamurugan, Senior IT Manager, Goodwood Ship Management, noted:

'Starlink has completely changed the way we manage the IT support of our vessels. We've gone from being able to resolve a few cases daily to closing almost all open cases each day-purely because of the improved connectivity.'

Business Impact and IT Efficiency

Before implementing Starlink, the Goodwood fleet relied primarily on VSAT as its main communication channel. Although VSAT has served the industry reliably for over a decade, the shift to LEO-based Starlink has brought unprecedented performance and stability. 'We used to face regular connectivity complaints,' said Mr. Balamurugan. 'Now, Starlink's stability has all but eliminated those issues. We've have had very rare instances of downtime.' The improved bandwidth and low latency have enabled seamless remote access for IT support, real-time video calls, and much faster software deployments and troubleshooting. 'Before Starlink, around half of our IT tickets were related to connectivity. Today, that number is close to zero.'

Operational Advancements Onboard

With Starlink, Goodwood has introduced real-time ERP syncing, cloud-based patch management, and even live updating of charterer and government forms directly from vessels. 'It's like having a floating branch office,' Mr. Balamurugan explained. Microsoft Teams has also been rolled out fleetwide, allowing instant messaging and collaboration between shore offices and ships. Training for ERP upgrades, previously done via PDFs, is now conducted via interactive video calls, making standardization across the fleet faster and more effective.

Fleet Overview and Starlink Rollout

Across their vessels, Goodwood uses a 500GB Starlink data plan with a pooled data option that allows efficient bandwidth distribution throughout their fleet. Navarino's Infinity solution is deployed fleetwide, providing comprehensive management capabilities, while VSAT services (including Spectrum) complement the connectivity setup.

Navarino Supports Zanneios High School Robotics Team "S.P.A.C.E."

Navarino proudly celebrates the success of the Robotics and Space Club "S.P.A.C.E." of Zanneios Model High School of Piraeus, which achieved **3rd place worldwide** in the international Zero Robotics competition organized by MIT and NASA.

Competing against 100 teams from around the world, the students programmed autonomous robotic devices operating aboard the International Space Station as part of this year's mission, "Galactic Greenhouse".

Navarino has supported the team for several years through technology donations and participation in Hackathons. We congratulate the students and their teachers and will continue to support young innovators.

Navarino at the Asia Pacific Maritime Exhibition

In March, Navarino's Asia team proudly participated in the Asia Pacific Maritime Exhibition, one of the region's leading maritime gatherings, held in Singapore.

The event brought together industry leaders, ship operators, and technology providers from across the Asia-Pacific region. Navarino's stand welcomed a steady flow of visitors throughout the exhibition, offering an opportunity to reconnect with long-standing partners and engage with new industry stakeholders.

Navarino continues to play a key role in supporting ship operators across Singapore and the wider region with advanced connectivity and technology solutions. From high-performance satellite communications to digitalisation services, the company remains committed to enabling smarter, more efficient, and more connected maritime operations.

Navarino Elements Delivers Successful Dual Wärtsilä ECDIS Installation in Korea Within Tight Timeline

In a recent project that exemplified Navarino Elements' commitment to excellence and technical expertise, the team responded to an urgent request to attend a vessel in Korea for a full dual Wärtsilä ECDIS installation. The request came with a strict deadline, leaving only four days to complete the task, including travel time.

Despite the numerous logistical challenges, including travel disruptions and the demanding nature of the task at hand, Navarino Elements' engineers ensured the job was done on time and to the highest standards. The project was essential for maintaining the vessel's navigational safety and compliance.

The Navarino family comes together in Athens for our Annual Event

In February 2026, Navarino colleagues from the globe came together in Athens for our annual company gathering, held at the Eugenides Foundation. Each year, the event is an important opportunity to reflect on the year behind us, reconnect as a global team, and align on the priorities that will define the coming months.

Thank you to everyone who joined and contributed to the day. As we look ahead, we do so aligned, ambitious and ready for the next phase of growth!
